NEW
SPACE
DESIGN
DIMENSION

A stylish and durable solution for outdoor spaces and ventilated terraces? Ensure that your environment is different not just because of its aesthetic values but also of the innovative 2.0 terrace slab solutions. Thanks to the cutting-edge manufacturing technology, the slabs can get close to any looks, from the most refined natural materials, e.g. stone or wood, to the raw concrete, geometric structures or unique colours. **Easy to install, do not require any adhesive or joints.**

They **ensure water removal and are resistant to adverse weather conditions.** The ageless design, durability and functionality in versatile applications make them a perfect solution for both private terraces and commercial areas. **Their design consistent with other porcelain products, including stairthreads, tiles in different sizes or even TRI-D sintered stone enables harmonious combinations indoors and outdoors.**

DESIGNING FREEDOM

Imagine slab laying with no need to use any adhesive, joints or complicated systems. It has never been so easy to design your dream space. **You can delineate zones and run paths in different locations which can easily be modified once you change your mind!** Since the slabs can be installed on such surfaces as e.g. sand, gravel or grass, you can make paths and pedestrian pavements of any width to complement the composition of vast green areas or household gardens by means of individual slabs or sets thereof.

UNIVERSAL APPLICABILITY

Your dream space wherever you want! Vast application opportunities, cutting edge technology guaranteeing durability and different design will allow you to design a beautiful and functional environment. Traditional and ventilated terraces, patios, driveways, car parks and garages or relaxation zones. **Create an aesthetic space which will be durable and consistent in terms of design with the other rooms in your home or workplace.**

EASY TO KEEP CLEAN

Low absorbability and cutting-edge technology will allow you to save time spent on keeping clean. Agents for 2.0 slab cleaning are popular and easily available in shops selling household chemicals. **This makes the slabs perfect for restaurant interiors, while their fast installation and removal facilitates moving and expanding that zone to vegetated areas or outdoor seating areas.** Their rich colour palette enables to delineate individual zones e.g. in holiday resorts.

PERFECT FOR BUSINESS AND RELAXATION

Thanks to their resistance to load, abrasion, staining and to different substances, the slabs will be great in various industrial areas exposed to heavy use. Their **high anti-slip properties** will make any places exposed to continuous contact with water (e.g. swimming pool zones) both **safe and highly appealing.**

Deep, graphite raw concrete hue gives some secrecy and gravity to the design. The colourful tiny particles on the slab surface reinforce the elegant depth effect. Such a combination harmonizes not only with the modern industrial style but also with some more traditional designs. The slabs can be used as a base or a well-perceivable detail, creating intriguing contrast which makes the entire space more dynamic.

RITUAL TAUPE

matt structure / size: 59.5x119,5 cm

The slabs inspired by taupe pulpis stone, the colour of which can be described as a subtle combination of brown and grey, are now available for outdoor areas. A combination of a soft, subtle background and delicate, light lines and discolourations make the slab seem warmer. Taupe colours are associated with elegance and calmness which make them a perfect base for the entire design. Thanks to them, you can make a cosy, refined space which will allow you to relax outdoors..

RITUAL LIGHT GREY

matt structure / size: 59.5x119,5 cm

This beautiful grey hue seems delicate and subtle. The inspiration with natural pulpis stone allows to get a highly realistic effect by the combination of a light background and soft lines and discolourations. The subtle grey combines elegance and lightness, creating the atmosphere of tranquillity and harmony. The neutral tones make the slabs go well with other components, introducing the sense of cleanliness and lightness to the space. Thanks to this versatile nature, it is a perfect match for other colours allowing to create customised compositions.
